LiNC

SOFTWARE FUNCTIONS

TRACKING
View assets and live track a remote unit. One button quick reports and visible asset entries provide tracking information. Configure assets and quickly access diagnostics.
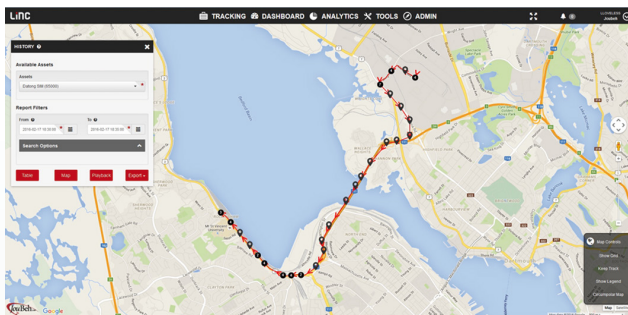

DASHBOARD
General overview of configured settings and reports from assets. Customer specified deployment information. Configure asset deployment information to provide notes and remarks.
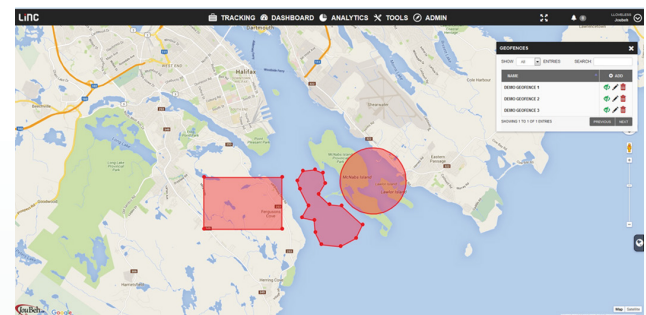

ANALYTICS
Easy-to-use playback interface overview with sophisticated controls. Create comprehensive reports to provide details on how often assets report data, plus History and Stop reports.

MINIMUM HARDWARE REQUIREMENTS
Manage and configure mapping tools like GeoFences and Points of interest (POI). Add custom admin roles and create new user accounts. Also add new assets and setup device groups for simplified organization throughout your asset inventory. 50MB hard-drive space for software installation. More space required for accumulated tracking data and cached maps

Live asset tracking

Custom GeoFences

SUPPORTED BROWSERS

Internet Explorer 10	Chrome (recommended)
Internet Explorer 11	Firefox 26 (and up)
Safari 9
